

# Non-communicable diseases (NCDs) in Europe

Vandenberghé and Albrecht, 2019

Non-communicable diseases (NCDs) include cardiovascular disease, cancer, chronic respiratory disease and diabetes, and cause 60% of deaths globally.

## In Europe...

01

90 % of all deaths are caused by NCDs, of which:

- 40% by Cardiovascular disease
- 26% by Cancer,
- 5% by Chronic respiratory disease
- 2% by Diabetes

02

Preventive health care showed that can eliminate within the age group of 35 to 65 years old :

- 93% of diabetes cases
- 81% of heart attacks
- 50% of strokes
- 36% of cancers

03

These four NCDs contribute to at least 25% of total health care spending which imposes almost 2% of GDP economic cost
